

QUINTRON VoIP NET-CENTRIC COMMUNICATIONS

The DICES VoIP System provides unparalleled multi-channel voice communication features for the most demanding command and control requirements. User IP keysets include this weather-proof version certified for hazardous area usage. This new system is the next chapter in the exceptional Quintron legacy at space launch centers around the world.

IT CAME FROM OUTER SPACE

So Innovative, We Won an Award!

Frost & Sullivan selected Quintron as the recipient of the 2007 Product Innovation of the Year Award in the North American C4ISR markets.

OUT OF THIS WORLD TECHNOLOGY AT A DOWN TO EARTH PRICE

Quintron's VoIP Net-Centric Communications

The DICES VoIP System provides exceptional multi-channel voice communications for control center personnel in a fault tolerant client-server operating environment. User access can be provided by IP Keysets (desk, rack and wall-mount hazardous-certified) or software-only clients on user computers. Legacy audio can be integrated via a T1 Gateway for complete interoperability. DICES VoIP: a new solution for command and control communications!
