Destination is
the Moon or
Second Grade,
We've Got
You Covered

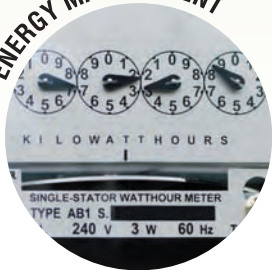

INFRASTRUCTURE

CCTV-AUDIO/VISUAL

ENERGY MANAGEMENT

Our future astronauts, educators, doctors, firefighters (or whatever else they choose to be) deserve every advantage we can give them—the best teachers, staff, supplies and facilities. But without a state-of-the-art and reliable technology infrastructure, your district's dreams may sputter out on the launch pad.

We're Quintron Systems, and mission-critical projects are our specialty. Since 1970, we have provided high-technology solutions for some of our nation's most critical applications, including the space program, intelligence agencies and major prime contractors around the country. We have also applied these same skills toward technology upgrades to major educational districts throughout California.

Get your district's technology infrastructure, CCTV-audio/visual and energy management solutions from one trusted, California-based source.

Quintron's Integrated Systems Division can supply a project design that works with your unique requirements and provide a complete turn-key installation solution. No third parties. No hassles. No mistakes.

Call us today and find out how we can launch your district's technology infrastructure into the future (spaceship not included).
