

# Every Time an Atlas V Takes Off...

## Quintron Turns On.

Besides the new Atlas V, it's safe to say that for the past decade, most times a rocket took off from the U.S., a Quintron DICES communication system was there supporting its launch. Through our partnership with United Launch Alliance, Quintron systems are currently used on more than 1000 active user stations at five launch sites and four control centers—for daily site communications, preparatory tests and final launch operations.

Mission Critical Jobs  
Done Right
