### **Quintron Systems and DMP Form Strategic Integration**

*Quintron Integrates its Unique Cross-Platform Integrated Access, Alarm, and Video Software Management Solution with DMP IDS.*

Santa Maria, CA (October 12, 2010) - Quintron Systems, Inc. ([www.quintron.com](http://www.quintron.com)), the recognized leader in advanced interoperable voice systems and physical access control/intrusion detection

systems, today confirmed the availability of an Integration that will leverage IDS Hardware from DMP to deliver a fully integrated security management platform.

"With our rapidly growing partnership with DMP, we have taken a major step forward as an important player in both traditional and managed/hosted integrated access and alarm

control solutions for commercial, industrial, and institutional customers," said Richard Finnegan, vice president and general manager at Quintron. "DMP is a prominent player in IDS systems for high security government sites, institutions, commercial, and industrial applications. Through our partnership, we have co-developed a software plug-in to allow Quintron's AccessNsite® and DMP Intrusion Hardware to fully support the access control and IDS features found in the DMP XR500™ Command Processor Panels."

**Integrated Access Control and Intrusion Detection**

As a member of the Quintron Strategic/OEM Partner Program, Quintron works closely with DMP to leverage the necessary resources, DMP expertise, and knowledge to deliver trusted, tailor-made solutions to channel partners and end user organizations, as well as providing superior service to enhance customer value.

“We are happy to announce this integration with the AccessNSite platform from Quintron,” said David Roberts, Vice President of Technical Services for DMP. “The Quintron software is extremely powerful and we look forward to the new opportunities that may come with this pairing of these two industry leading products.”
