Quintron Announces New President Dominick R. Barry

Santa Maria, CA (November 15, 2016) - Quintron Systems, Inc. (quintron.com), the global provider of mission critical voice conference systems and integrated electrical and network solutions, today announced that on November 1st Dominick Barry was appointed as the new company president. Mr. Barry brings over 35 years of diverse industry experience focused on Department of Defense (DoD) and NASA Range and Space Launch Operations. Mr. Barry assumes the position previously held by David Wilhite, and Mr. Wilhite remains with Quintron as the company's CEO.

“We welcome Dominick to the Quintron team and are excited about the potential he brings to our company,” said Mr. Wilhite. “In his new role as President, Dominick will be responsible for managing the day to day operations of the company and is challenged to expand our company’s market presence with our current product offerings while exploring some very exciting adjacent markets.”

“I have worked with Quintron personnel and used their equipment and installations throughout my career,” said Mr. Barry. “I am very honored to have been offered this opportunity and I look forward to representing a company that has come to be known for its exceptional quality, performance, and customer satisfaction.”

Prior to joining Quintron, Mr. Barry was the principal partner for Pro-Merit, Inc., providing executive level support to presidents, CEOs, and senior executives in the defense, transportation, information technologies, and space industries. Prior to joining Pro-Merit in January 2014, Mr. Barry was Vice President of Strategic Programs for the Global Security Group within URS Federal Services. In this position, Mr. Barry managed the development, planning, and implementation of a strategic initiative focused on the operations, maintenance, and sustainment of Department of Defense Major Range Test Facility Bases (MRTFB). Mr. Barry was also responsible for the formulation, development, and implementation of a broad based strategic approach to capture new business opportunities in the space, space launch, information operations, and intel sectors.

Mr. Barry holds a Master's of Science in Organizational Management and Behavior from Chapman University and Bachelor of Arts from San Francisco State University in Business and Organizational Behavior. Additionally, Mr. Barry holds multiple certifications in project management, technical problem solving, decision making, team development, and organizational change, as well as holding a lifetime teaching credential in Business and Industrial Management from the state of California.
